CVA render project

Production time and tool cost for the CVA architectural image and video set.

HANDS ON TIME

1 to 2 hrs

Range allows for redos when shots need another try.

TOOL COST

~$40

AI software, about 1,000 credits.

BEFORE AND AFTER

The same spa: the architect render, and the photo made from it.

Left: the flat render from the architect. Right: the AI photo made from it. Same room, same camera angle.

DELIVERABLES

19 images and about 40 video clips.

19

Photoreal images

8 wide views · 11 close up views.

~40

Video clips

Slow pans and push in shots.

PROCESS

Five steps.

1

Get the renders

Flat 3D renders arrive from the architect.

STARTING POINT

2

Make them photoreal

AI turns each flat render into a photo. Several versions per shot, keep the best.

20 TO 40 MIN

3

Make video clips

AI turns the photos into short clips. Slow pans and push in shots. Often a few tries each.

30 TO 50 MIN

4

Select and assemble

Pick the best shots, clean up, assemble in Final Cut.

15 TO 30 MIN

5

Deliver

Send the finished files to the client.

5 TO 10 MIN

Many versions are generated and discarded along the way. 86 files were kept for this job.

COST BREAKDOWN

Where the ~$40 went.

Video clips, about $34 Photos, about $6

Video is the main cost. On the unlimited video plan it drops toward zero.

Figures are AI software credits only. They do not include skill, direction or editing time. Made with AI tools and Final Cut Pro.
