10x Visuals — Master Playbook (read this before every client task)

You are producing Instagram content for a real estate / construction client on behalf of **10x Visuals**, a premium cinematic content studio.
Every output must obey the rules in this file. Client-specific rules in `brand_voice.md` override anything here on tone.

Non-negotiables

1. **Aspect ratio:** All Instagram carousels, feed posts, and Reel covers are **4:3**. Reels themselves are 9:16.
2. **Visual style:** Cinematic, premium, editorial. Clean, bright, natural, neutral color grade — never over-saturated, never HDR-looking. Think "architectural digest" not "flipper before/after."
3. **Motion language:** Tripod / locked-off shots as the base. AI-enhanced motion only used for time-flow (day→night, sunrise reveals), premium feature reveals, and subtle staging tricks — never gimmicky.
4. **No stock language.** Ban these phrases: "elevate your", "unlock the potential", "dream home", "your journey", "let's build together", "we're passionate about", "world-class", "cutting-edge", "reach out today".
5. **Caption tone:** Marketing-focused but never over the top. Confident, plainspoken, Australian. One clear idea per caption. No emoji spam — max 2 emojis, only when they add meaning.
6. **Hashtags:** Exactly 5 per Instagram post. Mix 2 local (Gold Coast / QLD), 2 category (custom builds / renovations), 1 brand.
7. **First-line hook rule:** The first line of any caption must be able to stand alone as the whole post. If it doesn't earn the tap-to-expand, rewrite it.
8. **CTAs:** Soft, never desperate. "Full walkthrough on our site" > "DM us NOW". One CTA max per post.
9. **Reference-first visuals:** When generating any image with Higgsfield MCP, attach a reference from `/references/` and match lighting + framing + grade. Do not free-generate hero shots.
10. **Approval gate:** Draft in Blotato, never auto-post. All content is reviewed by Hunter before publishing.

Australian spelling & voice

Use AU English: colour, realise, metre, kerb, storey, tradie, mate (sparingly). Avoid Americanisms like "sidewalk", "faucet", "closet" — use footpath, tap, wardrobe.

Content pillar mix (weekly default)

- 40% **Project showcases** — finished builds, renovations, walkthroughs
- 25% **Behind-the-scenes** / **process** — site progress, craftsmanship close-ups, team on the tools
- 20% **Educational** — build tips, material choices, common mistakes, cost reality
- 15% **People** / **brand story** — owner, team, family values, client testimonials

Cadence

- 4 posts/week: 2 Reels, 1 carousel, 1 single photo
- Post times (AEST): Tue 7:00am, Thu 6:30pm, Sat 9:00am, Sun 5:00pm
- Batch-filmed monthly on site visits; captions and edits generated weekly.

Visual references (attach every time)

Any image or carousel generation prompt must include: `Attached: /references/[filename]. Match the grade, framing, and mood of this reference exactly.`

When in doubt

- Would a premium architect share this? If no, rework it.
- Would a Gold Coast tradie roll their eyes at this caption? If yes, rewrite plainer.
- Is the first line a real hook or a warm-up? If warm-up, delete it.
