10X VISUALS

PRODUCTION BRIEF · MVX ELECTRICAL

Two Facebook ads Video shoot brief

Monday 3 August 2026 · Gold Coast

SHOOT DAY	ON CAMERA	TIME NEEDED	DELIVERING
Mon 3 Aug **Morning or late arvo**	**Matt** **MVX Electrical**	**About 2 hours** **Two locations**	**6 vertical ads** **20 seconds each**

Two ads. One about the general electrical work around a house — the small jobs people put off. One about new builds and renos. Matt talks to camera, with close-ups of real work cut over the top.

Each ad gets filmed in three pieces and cut together afterwards: an **opening line**, a **middle**, and a **sign-off**. We film **three different opening lines** for each ad, because the first three seconds is what decides whether anyone stops scrolling. Same middle every time. That way we can run all three, see which opening works, and keep the winner.

Twelve takes all up. Nothing here takes more than about twenty seconds to say.

01 The lines

Don't learn these word for word — read them a couple of times, then say them how you'd actually say them. If a word feels wrong in your mouth, change it. You'll sound better than the script does.

AD 1 General electrical work

OPENING LINES — WE FILM ALL THREE

1 Everyone's got a list. Fan that doesn't work. Powerpoint hanging off the wall. Downlight that's been out since Christmas.

2 If you're getting a sparky out anyway, get the whole list done while he's there.

3 People call us for one thing. Then remember four more while we're standing there.

THE MIDDLE — SAME ONE EVERY TIME

> We're MVX. Electricians, Gold Coast and Northern NSW.
>
> Fans, lights, powerpoints, switchboards, safety switches. All of it's us, so it all gets done in the one visit.
>
> And we'll tell you straight what needs doing and what doesn't.

SIGN-OFF — WE FILM BOTH

A Send us your list. We'll tell you what it takes.

B Flick us a message with what's on the list, and we'll get back to you.

AD 2 New builds & renos

OPENING LINES — WE FILM ALL THREE

1. If you're building or renovating, the electrical's the bit people leave too late.
2. Work out where your power and your lights are going before the plasterer turns up. Not after.
3. Cheapest time to change your mind on the electrical is before the walls go up.

THE MIDDLE — SAME ONE EVERY TIME

> MVX. We do the electrical on new builds, renos and extensions. Gold Coast and Northern NSW.
>
> We'll work off your plans. Where the lights go, where the power goes, switchboard, right through to fit-off.
>
> We work in with your builder, and we turn up when we say we will.

SIGN-OFF — WE FILM BOTH

A. Send us your plans and we'll get you a quote.

B. Flick us a message, even if you're still just planning it.

TWO LINES TO OKAY BEFORE WE FILM

"We turn up when we say we will." Best line in either ad — and only worth saying if it's true every time. Happy to cut it.

"Where the lights go, where the power goes." Kept deliberately simple. If you do proper lighting plans, tell us and we'll say that instead.

02 Saying it

- Talk to the camera like you're talking to a customer at the front door. Same voice.
- Keep it short and stop. No need to fill the silence.
- Look at the lens, not the screen.
- We'll do each one three or four times. The first one's always the worst — that's normal.
- If you fumble a word, keep going. Don't start again, we'll cut around it.
- Nothing here is longer than twenty seconds.

03 The shoot

Twelve takes, two spots

#	WHAT	WHERE
1–3	Ad 1 — opening lines 1, 2, 3	Spot 1
4	Ad 1 — the middle	Spot 1
5–6	Ad 1 — sign-offs A and B	Spot 1
7–9	Ad 2 — opening lines 1, 2, 3	Spot 2
10	Ad 2 — the middle	Spot 2
11–12	Ad 2 — sign-offs A and B	Spot 2

Shoot everything at spot 1 before moving.

SPOT 1 — GENERAL ELECTRICAL

In front of the van, or at a switchboard. Needs to read as a normal house.

SPOT 2 — NEW BUILDS

An actual site. Frame up, bare studs, rough-in showing.

> **NEED TO KNOW BEFORE MONDAY**
>
> **Matt — have you got a site we can stand on?** If not, we'll do it with the plans on the ute tailgate instead. Not as good, but it works. Better to sort now than turn up and find out.

Same shirt at both spots. Takes get mixed between the two ads in the edit, so it has to match — not an MVX polo at one and hi-vis at the other.

04 Camera, sound, light

CAMERA

- **4K 16:9, framed for a centre 9:16 crop.** Cropping 4K to vertical still lands above 1080×1920, so we keep the resolution and can reframe later. Crop guides on — don't eyeball it.
- **25fps** for talking, **50fps** for close-ups so they can be slowed.
- **S-Log3**, usual pipeline. Lach's grading it to match the rest of the MVX work.
- Matt sharp from ear to ear. Shallow, not silly.
- Eyes on the upper third, and **keep the top 15% and bottom 20% clear** — that's where Facebook's buttons and our captions land.

SOUND — THE ONE THAT RUINS THE DAY

Outdoors, next to a van, on a site. Wind is the actual risk, not the camera.

- **Lav on Matt**, deadcat on it, cable hidden.
- **On-camera mic running as backup**, always.
- **Headphones on all day.** Check between spots, not at the end.
- Plane, drop saw or truck over a take — call it and go again straight away. Five seconds now, unfixable later.

LIGHT

- **Avoid roughly 11am–2pm.** Morning or late arvo, or find shade.
- Open shade, or backlit with a bounce. No hard sun on his face.
- Indoors at a switchboard: small LED to lift his face, let the practicals do the rest.

05 Close-ups — grab after the talking

A few seconds each, no camera moves. Just hands working. Six to eight per ad is plenty.

AD 1 — GENERAL ELECTRICAL

- Screwing a powerpoint cover on
- Fan starting up
- Switchboard door opening
- Testing a safety switch
- Downlight going in
- Van door shutting with the tools

AD 2 — NEW BUILDS

- Cable running through the studs
- Marking a stud with a pencil
- Plans held up in frame
- Drilling a joist
- Switchboard rough-in on a bare wall
- Wide of the frame with someone working in it

Check `photos/` first — two of the new-build shots already exist as stills. Don't reshoot what we've got.

06 Files and handoff

Name on ingest so Lach isn't guessing:

```
MVX_AD1-GEN_HOOK-01_T01.mov
MVX_AD1-GEN_MIDDLE_T01.mov
MVX_AD1-GEN_CTA-A_T01.mov
MVX_AD2-BUILD_HOOK-01_T01.mov
MVX_BROLL_AD1_powerpoint-cover.mov
```

- Offload both cards to the SSD on the day, before anything gets formatted. Then SSD to Drive via rclone.

- **Circle the good takes on set.** Note the take number against each line while it's fresh — nobody wants to watch four versions of the same sentence next week.

07 The edit

Round one: three cuts per ad. Six all up.

One per opening line, all using the same middle and **sign-off A**. That's it.

Hold sign-off B back. We test the opening lines first; once one wins, sign-off B becomes the next thing we test against it. Cutting all twelve combinations now means six of them never run.

EVERY CUT

- **20 seconds**, 1080×1920, H.264.
- **Captions burned in the whole way through.** These get watched on mute — that's the default, not the exception.
- Opening line on screen as text too, held the full three seconds. **Static, not animated in** — movement competes with the scroll instead of stopping it.
- Brand green on the sign-off only, no more than about 10% of the frame.
- Close-ups cut under the middle. Matt on screen for the opening line and the sign-off.
- One grade across all six so they look like a set.

> **ON UPLOAD**
>
> **Turn Advantage+ creative enhancements off on every ad** — both text improvements and visual improvements. Meta will otherwise re-crop the frame and rewrite the copy, and re-cropping a vertical we framed deliberately for caption safe zones is exactly the damage that setting does.

08 Before Monday

- [ ] **Site access for spot 2** — Matt. The one that changes the plan.
- [ ] **Confirm Matt's on camera.** The whole “we are the electricians” angle only works owner-led.
- [ ] **Matt okays the two flagged lines** — “we turn up when we say we will”, and how we describe the lighting and power work.
- [ ] **Call time and wardrobe to Matt**, with this brief attached.
- [ ] **Crew roles set** — who's shooting, who's on sound. Somebody has to be on headphones.
- [ ] **Batteries, cards, lav batteries, deadcat.**
